

Q: Consider the following statements with respect to Outcome Budgeting

1. It links the outlay of funds by various government ministries and departments to their expected outcomes.
2. The concept of outcome budgeting was introduced in India in 2005.
3. It is mandatory for all State Legislative Assemblies to follow Outcome budgeting.

How many of the statements given above is/are correct?

- a) Only one
- b) Only two
- c) All Three
- d) None of the above

Ans: b

Explanation:

- Outcome budgeting is a budget process that connects resources with results.
- The concept of outcome budgeting was introduced in India in 2005.
- It mandates that the ministries and departments at all levels should be involved in a meaningful way in the implementation processes of the developmental schemes across the country.
- The main objective of the Outcome Budget is to create a direct connection between the financial investments made by the government in various programs and schemes, and the results expected from those expenditures.
- Outcome budgeting is not followed in all states.
- Around 11 Indian states including Assam have started following the practice of formulating their OBSs in the past few years.
